

# Information & Intelligence

Using a combination of open and in-country information sources to produce an in-depth assessment, NYA can give you detailed background knowledge to make informed decisions.

## About NYA

NYA International is a global risk and crisis management consultancy.

For over 25 years we have helped organisations to maximise opportunities and operate successfully in challenging environments around the world.

It is critical to understand the security risks to personnel, assets and operations when investing and working in demanding and difficult environments.

NYA produces a range of information and intelligence products, using both open source and in-country contact resources, to help organisations maintain situation awareness and aid timely and informed decision making.

We tailor our analysis, providing detailed city, country and regionally focused reports according to specific requirements. These assess indigenous political and security risks and harness NYA's extensive regional consultant network – providing a timely and accurate assessment of the risks to people and operations on the ground.

## Kidnap & ransom reports

Our kidnap & ransom reports cover the nature of the risk, trends and high-risk areas within cities, regions and countries of interest. These reports can be produced on request and are tailored to specific requirements.

## Security reports

Our detailed, bespoke security reports provide an in-depth understanding of the wider security concerns in a city, region or country of concern, including crime, extortion, political and civil unrest, ethnic and sectarian violence, terrorism, insurgency, health and natural hazards.

## Land flash reports

NYA's Operations Centre monitors events in countries as they unfold and provides 24/7 flash reports for countries of interest. These short reports notify the reader of an event location and description and include terrorist attacks, civil unrest and other disruptive actions.
