

Maritime Information & Intelligence

NYA's dedicated maritime team and global network provides a range of information and intelligence - to give you a better understanding of your maritime operating environment and aid informed decision making.

About NYA

NYA International is a global risk and crisis management consultancy.

For over 25 years we have helped organisations to maximise opportunities and operate successfully in challenging environments around the world.

In an increasingly litigious society companies are more frequently asked to demonstrate the thinking and evidence that has informed their decisions. NYA is trusted by insurance underwriters to assess and provide an objective analysis of the nature and level of maritime security risk. The information we provide is available in a range of formats, including (but not limited to):

Live alerts

We provide a 24/7 live alert service, informing nominated personnel (such as CSO / DPA) by phone, SMS or email of any new maritime security incidents that may affect an asset or shore-based operations. If NYA is authorised then we will contact the Master or Bridge Watchkeeper directly and inform them of any imminent threats.

Maritime security reports

Our comprehensive weekly and quarterly reports on global maritime security incidents can be tailored to specific areas of interest. They provide an 'at a glance' overview of recent piracy and other maritime security incidents as well as analysis of regional trends and the impact on companies operating in these regions. Information for the reports is gathered from both open and closed sources.

 NYAIntl

Bespoke intelligence reports

NYA can provide you with a detailed understanding of a particular region, site or operating issue. Our reports are tailored to meet your specific requirements, from the nature and severity of security risks to regional legislation around the use of armed guards and other considerations.

These reports are researched and produced by our analysis and intelligence team, working alongside trusted and corroborated in-country intelligence sources in key regions around the world.
